

TuffWrap[®] Installations Projects MANUFACTURING

Bedding Company Reroofing Project

OVERVIEW

TuffWrap[®] Installations played a crucial role in keeping the Louisville Bedding Company, the largest manufacturer of mattress pads, toppers, and one of the top bed pillow producers, fully operational during a major reroofing project. The facility, built in the 1970s, required the removal of two previous roofs before installing a new one, which was expected to generate significant dust and debris.

To ensure the safety of employees and protect the products being made, the company turned to TuffWrap[®] for effective containment of dust, debris, and contaminants throughout the project.

CHALLENGE

The primary focus of the reroofing project was to prevent dust and debris from entering the company's storage and production areas and potentially damaging sensitive bedding products. There were concerns about dirt and debris staining the product and getting into some of the equipment as well. Louisville Bedding's day-to-day operations were expected to continue without interruption.

In addition, installation work needed to be completed within eleven (11) consecutive nights, a 10-hour shift schedule. To protect all aspects of the facility, several key concerns were addressed.

- Create safe access points for the lifts
- Ensure all dust and debris were captured
- Protection of specialized work areas near the ceiling
- Protect equipment, products, and other valuable assets
- Meeting strict project deadlines

LOCATION

Louisville, KY

CLIENT(S)

Louisville Bedding Company

SOLUTION

SmartSeam[®]
Suspended Cover

SIZE

52,000 sq. ft.

DURATION

11 consecutive nights, 10-hour shifts

SOLUTION

TuffWrap® utilized their SmartSeam® Suspended Cover system to protect the facility, ensuring that the reroofing project commenced ahead of schedule. The Louisville Bedding Company remained fully operational throughout the project, with all equipment, products, and personnel safeguarded from dust, debris, and weather. This successful outcome met the client's expectations and reinforced the quality of TuffWrap®'s service.

“TuffWrap has been great to work with. The project manager I worked with was very impressive, his skill and his customer service focus presented the Tuffwrap company in a very positive way. I also see the excellent support network you guys have in place. Great effort by all! Look forward to seeing you guys here probably next year sometime when we do the next one. ”

- C. Price, Process Engineer, Louisville Bedding Company

CONCLUSION

TuffWrap's team demonstrated exceptional coordination and expertise, addressing Louisville Bedding Company's main concerns and surpassing their expectations. The project was completed ahead of schedule, using the TuffWrap SmartSeam Suspended Cover to safeguard the facility, bedding products, and personnel from dust, debris, and environmental contaminants.

This solution effectively minimized the impact of the reroofing process on the company's operations, ensuring protection for both the facility and its workers.
